DETAILED ACTION

Applicant's election of group I (claims 8-15) in the reply filed on 02/14/2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Specification

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002

Art Unit: 2871

do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 8 and 13-15 are rejected under 35 U.S.C 102(e) as being anticipated by Yang, US Patent No. 7,142,260.

The above claims are anticipated by Yang's figure 5 which disclose a pixel structure comprising a single type low temperature polysilicon thin film transistor (TFT) (see claim 2) and a storage capacitor (580) as claimed. It should be noted that a second substrate, a liquid crystal layer, a color filter and a liquid crystal capacitor inherently forming in a liquid crystal display device (as evidence from Description of the Related Art).

4. Claim 8 and 13-15 are rejected under 35 U.S.C 102(e) as being anticipated by Yang, US 2005/0190312 A1.

The above claims are anticipated by Yang's figure 4 which disclose a pixel structure comprising a single type low temperature polysilicon thin film transistor (TFT) (LTPS) and a storage capacitor (480) as claimed. It should be noted that a second substrate, a liquid crystal layer, a color filter and a liquid crystal capacitor inherently forming in a liquid crystal display device (as evidence from Description of the Related Art).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2871

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yang, US Patent No. 7,142,260 or Yang, US 2005/0190312 A1.

Regarding the above claims, Yang ('260 and '312) disclose the claimed invention as described above excepted for the P-doped type and/or N-doped type region TFT (and connecting to the bottom electrode of the storage capacitor). Yang ('260 and '312) do disclose the doping step of forming the TFT. Therefore, it would have been obvious to one skilled in the art at the time of the invention was made to perform a doping a TFT (P-type or N-type) and a bottom electrode of a capacitor, since it is a common practice in the art for implanting ions into TFT purposes.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
